VIKAS B

Software Developer | Python Developer | MERN Stack Developer

Mail ID: sbvikas04@gmail.com
Phone No: +91 9597701490
LinkedIn: linkedin.com/in/vikas-vk
GitHub: github.com/vikas-040304

Career Objective:

Electrical and Electronics Engineering graduate with hands-on experience in software development, web technologies, and Python programming. Built 4 full-stack and desktop projects — including an e-commerce platform, a 2D action game, a task-management app, and an AI voice assistant — using React.js, Python, JavaScript, and MySQL. Completed a Cloud Computing internship and additional training in Data Science and Java. Seeking opportunities as a Software Developer, Python Developer, or Associate Software Engineer.

Skills:

- **Front-End:** React.js, HTML5, CSS3, Bootstrap, Responsive Design.
- **Programming Languages:** C, Python, JavaScript, Java (basics).
- **Database:** MySQL.
- **Tools:** GitHub, Git, VS Code, XAMPP, PyInstaller.
- **Design & Creative Tools:** Canva, Figma, Video Editing, Logo Design.
- **Soft Skills:** Communication, Presentation, Team Work.

Professional Training & Internship:

- **Cloud Computing** | Gateway Software Solution IT & ITES, Coimbatore | Jan 2023 – Feb 2023

Project 1: Renofix – Home Improvement & Gardening E-Commerce Website

- **Technology:** HTML, CSS, JavaScript, PHP, MySQL
- **Tools Used:** VS Code, XAMPP
- **Project Type:** Full-Stack E-Commerce Application
- **Responsibilities:** Developed a full-stack e-commerce platform with user authentication, product search/filtering, shopping cart, checkout, and MySQL database integration.
- **GitHub:** github.com/vikas-040304

Project 2: Jujutsu Sorcerer RPG – 2D Action Game

- **Technology:** Python, Pygame
- **Tools Used:** VS Code, Git & GitHub, PyInstaller
- **Project Type:** 2D Desktop Game Application
- **Platform:** Windows OS
- **Responsibilities:** Developed a 2D action RPG with player movement, combat mechanics, enemy spawning, game state management, parallax scrolling backgrounds, special abilities, and sound integration. Packaged the application as a standalone executable using PyInstaller.
- **GitHub:** github.com/vikas-040304

Project 3: React Todo Application

- **Technology:** React.js, HTML, CSS, JavaScript
- **Tools Used:** VS Code
- **Responsibilities:** Built a task management application with full CRUD operations and Local Storage integration using React.js.
- **GitHub:** github.com/vikas-040304

Project 4: Jarvis AI – Python Voice Assistant

- **Technology:** Python, SpeechRecognition, pyttsx3, Google Gemini API, Spotipy (Spotify API), PyAutoGUI, pywhatkit, pystray
- **Tools Used:** VS Code, Git & GitHub, PyInstaller
- **Project Type:** AI Voice Assistant Desktop Application
- **Platform:** Windows OS
- **Responsibilities:** Developed a voice-controlled desktop assistant that recognizes spoken commands, replies with text-to-speech, answers queries using Google Gemini AI, controls Spotify playback, and automates system tasks. Runs from the system tray and is packaged as a standalone executable using PyInstaller.
- **GitHub:** github.com/vikas-040304/Jarvis-AI

Education:

Qualification	Board/University	Year	Percentage
B.E	SNS College of Engineering	2025	6.53 CGPA
Diploma	Sri Ramakrishna Mission Vidyalaya Polytechnic College	2022	80%
10th	Madonna Matric Hr Sec School	2019	63%

Courses:

- **Data Science |** Devtown | Jan 2024 – Mar 2024
- **Core Concept of Java |** Devtown | May 2025 – June 2025

Certificates:

- **Android App Development Workshop** | 2024
- **Cloud Computing Internship Certificate** | 2023

Achievements:

- Runner-up – District Level Tennis Ball Cricket Tournament (2015)
- Participated in coding events & technical expos

Languages:

- English
- Tamil
- Kannada

Hobbies:

- Playing cricket and shuttle
- Watching Anime
- Volunteering
